

Benefits of Certified Six Sigma Black Belt (CSBB) with Gulf Lead Consultants

- You (the participants) will get a chance to learn more about the Six Sigma model for continuous process improvement.
- You will learn more about the tools and techniques for continuous improvement.
- You will have a chance to work on two projects, simply any two of your own improvement in your organization.
- You will take the credit for completing the projects and an additional credit by using them towards your certification as a Certified Six Sigma Black Belt (CSSBB) by the American Society for Quality (ASQ).
- Your organization will benefit by two completed projects that improve its organizational effectiveness.
- Each project will go through the following phases:
 - Projects for product/process improvement will be identified and a Project Charter will be developed.
 - Teams will start the implementation of the different phases of six sigma model (DMAIC).
 - Teams will be formed and a team leader will be selected.
 - Team Leaders will go through training on the six sigma philosophy and tools.
 - Team members will receive adequate training to understand the improvement process, project management and implementation.
 - You will be closely mentored by GLC personnel throughout each phase of the project.

When you complete the project:

- You will be recognized as CSSBB and affidavits of the two projects completion will be issued by GLC.
- An intensive preparation course will start to prepare you for the ASQ certification examination as CSSBB.
